PROFILE

A dedicated and results-driven Full Stack Software Engineer with over 4 years of experience in developing and maintaining high-performance web applications. Holding a Bachelor's degree in Computer Science with a Second Class Upper division, I have honed my skills in both frontend and backend technologies, delivering robust and scalable solutions. Currently excelling in a full stack role, I am seeking to leverage my expertise and leadership abilities to take on the responsibilities of a Senior Software Engineer, contributing to innovative projects and driving technical excellence within a forward-thinking team.

CORE SKILLS

Backend: Java 17/21, Spring Boot, REST APIs, JPA/Hibernate

Frontend: Angular 14/17/21, TypeScript, HTML/CSS

Databases: Oracle, MySQL, MongoDB

Cloud / DevOps: AWS, GCP, Docker, Git

EXPERIENCE

Senior Software Engineer – Full Stack (May 2021 – Present)

DirectFN Sri Lanka (Colombo) | Onsite Saudi Arabia (1 year)

- Developed enterprise web applications using Angular, Spring Boot, and Oracle DB.
- Provided onsite production support and collaborated directly with international clients.
- Created REST APIs, UI modules, and handled system integrations.
- Led feature development, code reviews, and mentored junior engineers.
- Managed deployments, production issue resolutions, and performance improvements.
- Led data migration activities for projects and played an active role in Go-Live events

Key Projects:

IPO Project: UI + API development, enhancements, integrations, requirement analysis, mentoring juniors, code reviews

ALKB Project: Database patching, production fixes, deployments, feature testing, and cross-team collaboration

Technologies: Angular, Spring Boot, OracleDB, Git

Intern – Full Stack (Oct 2020 – Apr 2021)

Inova IT Systems | Colombo

- Contributed to the full-stack development of the project ETFB, a web based application. Responsibilities included requirements gather and analysis, system design, development, integrations, testing, and bug fixing, allowing me to gain hands-on experience across the full software development lifecycle

Technologies: Angular, Spring Boot, Swagger, SVN

Full Stack Developer – Part Time (2019 - 2021)

TESS-TA OCR System

- Worked part-time on TESS-TA, a web-based Optical Character Recognition (OCR) system supporting Sinhala, English, and Tamil. Responsibilities included implementing new features based on client requirements, dockerizing the application for deployment across multiple environments with proper configurations, and hosting the system on Google Cloud Platform (GCP).

Technologies: Spring Boot, React, MySQL, Docker, Git

Sri Lanka Foundation Virtual Conference Platform

- Developed a virtual conference platform for, Sri Lanka Foundation. The platform hosted a live exhibition successfully, attracting thousands of users who viewed virtual booths, connected with others, and participated in various events

Technologies: React, Express, MongoDB, AWS, Firebase, Git

EDUCATION

**BSc in Computer Science (GPA 3.53) – University of Colombo School of Computing
A/L – Royal College Colombo**

TECHNICAL INTERESTS

Java | Spring Boot | Angular | TypeScript | SQL | Oracle | MySQL | MongoDB | AWS | GCP |
Docker | REST | Git | CI/CD | Microservices | Agile
